Description

Ezidri Ultra Dehydrator Key Features

- **Simple to Use** - True variable temperature settings from 30 to 70 degrees centigrade. Suitable for Raw Fooders that want the enzymes
- **Expandable** - 5 trays supplied and can be expanded to 30 trays with the basic 10 trays. 10 trays available in a 10 tray set and 20 tray set.
- **Temperature is still gentle** - Unlike cheap dehydrators where there is only one temperature setting that is so high that it
- **No more over processing and over drying.**

Some of the things you can make in a Ezidri Ultra Dehydrator

- Dried fruits (mango, apples)
- Dried herbs (basil)
- Dried vegetables
- Dried tomatoes and other vegetables
- Veggie burgers, etc.

Why The Ezidri Ultra Dehydrator Is Unique Among Dehydrators The World Over

- **The Unique Air-flow System** The Ezidri airflow system with microprocessor and integrated PLD circuitries ensures accurate airflow temperature and exceptional expandability.
- **Speed Control** The Ezidri speed control system is a unique design as a variable speed.
- **Expandability** The Ezidri can expand to more than any other domestic dehydrator worldwide.
- **Rotation of Trays and Products** The Ezidri is not necessary. Unlike other dehydrators, the Ezidri does not require rotation of trays or products.
- **Automatic Shut-off** The Ezidri has the ability to be left overnight and not be automatically switched off before produce over-dries.

This dehydrator is great. You can stack it up to 30 trays which allows you to make big batches in one go. Its also great for pizza's!
