THREE WAYS TO CHARGE

FROM THE SUN. Recharge from the sun by connecting a compatible solar panel. Charge times are dependent on the size of the solar panel. Using (2) Boulder 200 Briefcase or Nomad 200 solar panels will provide up to 400W of solar and fully recharge the Yeti 6000X in 18-36 hours of sun for example.

FROM THE WALL. Plug it into the wall. Fully recharges in 12 hours using the included 600W Power Supply AC Wall Charger.

FROM THE CAR. The Goal Zero Yeti 6000X can be charged by plugging into your 12V adapter using the Goal Zero Yeti Lithium 12V Car Charging Cable. NOTE: Do not attempt to charge your Yeti Lithium from a 12V source using a regular charging cable. Doing so may cause damage to the unit.
