Description

Photizo Blush is perfect for the following:

- Reducing fine lines, wrinkles and crow's feet
- Improving skin texture and tone
- Stimulating the production of collagen and elastin
- Reducing the appearance of puffy eyes and dark under-eye circles.

Making your skin a priority with Photizo Blush

Photizo Blush will quickly transform your beauty regime, bringing you softer, and more youthful-looking skin with minimum effort, all in the comfort of your home.

Tackling fine lines and wrinkles from the inside out, Photizo Blush is an easy to use complement to your existing anti-aging and skincare

treatments.

How does Photizo Blush work?

Throughout the ages, sunlight (as the earliest form of phototherapy) has been known to have both healing and wellness properties. Light is energy, and energy sustains life – it cannot be destroyed, but it can be transformed into other forms.

Photizo Blush's LED light therapy harnesses the healing power of red and infrared light at specific wavelengths and frequencies which are proven to be effective in accelerating the natural healing and restoration of the skin.

LEDs, or light emitting diodes, are non-invasive, painless and do not require recovery time. The Photizo Blush's LEDs produce a gentle and soothing warmth and can be used on any skin type or colour.

Using Photizo Blush

Simply place the Photizo Blush's head (containing the LEDs) on the area to be treated, press the ON button and wait until the timed treatment ends, then move it to the next area requiring treatment. Repeat until you have finished treating all the desired areas.
